SESSION DESCRIPTION

As of 1 April 2015

Session 6.3 – Peer-to-peer partnership for sustainable water and sanitation service provision

Date: Tuesday, 14 April 2015  
Time: 11:00 - 12:30  
Venue: HICO, Gyeongju  
Room: 301

Language(s): EN, FR, KO, SP, TU  
Session access: Open  
Livestream available: TBC  
Contact: Jose Luis Martin Bordes and Anne Bousquet  
Email: jose.martin@unhabitat.org / julie.perkins@unhabitat.org

Summary

One form of cooperation has been steadily growing and evolving in the water sector. Not-for-profit partnerships amongst water operators and/or municipalities’ water department improve the capacity of operators to provide better, more sustainable services to the citizens. This type of cooperation is known as Water Operators’ Partnerships or 'WOPs'. There are many sister cities programmes covering the technical cooperation in the field of water and sanitation.

This session will help advance peer-to-peer partnerships by showcasing cities that are leading water cooperation activities around the world. The discussion will address the achievements of these activities in supporting sustainable water and sanitation services, as well as explore the challenges and opportunities for scaling them up in different contexts.

Objective

To advocate for more municipalities and/or water and sanitation operators implementing peer-to-peer support activities for better and sustainable water and sanitation service provision by showcasing good partnership practices.

Reference to Daegu-Gyeongbuk Water Action for Sustainable Cities and Regions

The "Daegu-Gyeongbuk Water Action for Sustainable Cities and Regions", states that Local and Regional Authorities will create partnerships with their counterparts in the vicinity or further away to pool finances and knowledge; perform their water services more efficiently. This session will focus on the peer-to-peer partnership between local and regional authorities for the purpose of better and sustainable water and sanitation service provision. Also since the significant role of the local and regional authorities for the purpose of capacity building of the water and sanitation operators is mentioned in the "Local Water Action"

For further information, please contact localregional@worldwaterforum7.org
as well as in the "Istanbul Water Consensus," the session will also showcase some cases of water operators partnerships – peer to peer partnership between water and sanitation operators – with focusing on the role of the local and regional authorities in their practice.
